## Children's Books

Those of us with children in our lives—our own, nieces and nephews, grandkids, friends—are familiar with the crazes that develop over certain books. What a great thing it is to witness children developing a passion for reading. A favourite book is devoured in a sitting and then read again and again.

## Series

Children love book series. The Walter Farley *Black Stallion* books are wonderful stories. They will grab the attention of even the reluctant reader. Try reading one to your child and before you know it, he will be reading ahead just to find out what happens next.

Chelsea Books has lots of series titles in stock (amongst the more than 2,000 books in our Children's Room), including:
